WASTE & RECYCLING: PROCEDURES & FACILITIES

Introduction

The Management of Waste and Recycling in the Workplace changed on 31 March 2025.

In summary workplaces must separate dry recyclable waste, food waste and non-recyclable waste from each other.

Having concluded new arrangements with our Waste Contractor (Veolia) we are going to achieve the changes by providing the following containers.

General Waste – Non-Recyclable Waste

Dry Recyclables – Plastic and Metal Containers

Dry Recyclables – Paper and Cardboard

Food Waste – Food Waste only – No Plastic Wrapping or Carrier Bags

Tenants have the responsibility of making their own internal arrangements and ensuring the correct waste goes into the correct containers. All waste must be placed inside the appropriate bin and not left in the surrounding area.

The containers will be emptied weekly/fortnightly depending on waste volumes.

Veolia have produced a series of self-explanatory flyers to assist with understanding as to what goes where. Attached below.

The containers will be in the usual location as shown on the site plan. Attached below.

We would like to thank Tenants in advance of their assistance.
